

EHS policy of Daiichi Sankyo Europe GmbH

Pfaffenhofen Site

Environmental protection, health protection and occupational safety (EHS) are essential guidelines for our actions and an integral part of our corporate activities. We see all EHS issues as a shared challenge for humanity and deal responsibly with the effects of our activities as a company. We accept our responsibility and are committed to complying with and implementing this EHS policy.

Reliable behaviour

We strictly adhere to applicable laws and regulations, regional agreements and voluntary commitments that often go beyond legal requirements.

Safe and healthy workplaces

We take the state of the art into account when designing workplaces and processes. We place the protection of our employees and our contractors on an equal footing.

Occupational health and safety and environmental management system

We operate an occupational health and safety and environmental management system at our production site, which we evaluate and improve on an ongoing basis. In this way, we contribute to a sustainable society. We regularly and comprehensively review the implementation of the requirements and the success of our management system in terms of target achievement and continuous improvement.

Low environmental impact

We use resources and energy sparingly. We avoid and reduce the emission of greenhouse gases and other pollutants as well as the generation of waste water. We avoid, reduce and recycle waste. We respect biodiversity and support the protection of ecosystems.

Preventive measures

We pay attention to risks and take preventive measures to avoid and reduce them. Preventive protection of people and the environment is our top priority.

Responsible employees and open dialogue

We promote understanding and awareness of occupational safety, health and environmental protection through information, training, further training and the involvement of employees in decision-making processes and actively seek communication with our employees and interested groups on all relevant topics.
